

Mylar® polyester film
Only by DuPont Teijin Films

Freshness in the Pack (Modified Atmosphere Packaging)

Application Description

Lidding on high barrier trays for Modified Atmosphere Packaging of fresh foods

Benefits

- Extended shelf life
- Improved product appearance
- Excellent clarity for enhanced product visibility

DuPont Teijin Films material selected and why

Mylar® 887 provides a high gas barrier to ensure that product remain fresh for the duration of their shelf life.

Technical Information – Mylar® 887

Product Description

Mylar® 887 is a one side PVdC coated film with excellent moisture and gas barrier properties. The film is available in a thickness of 14 micron.

Typical Applications

Mylar® 887 is typically used as the outside web of a laminate for meat, cheese, pasta or other fresh products.

Fig. 1

Practical Information

Mylar® 887 can be used in pasteurisable applications without loss of clarity or barrier performance. However, it is important to trial the final laminate under the exact conditions of use to ensure the performance meets the specific requirements. The PVdC side can be printed using typical PVB packaging inks.
